

The export and asset fixes pass

All nine PNG canvases match their SVG dimensions. The English export is now complete at 7000 × 7400 px.

VERIFIED LOCAL IMPROVEMENTS

44 + 2

Static page layouts + drawer overlays

8 / 8

Screenshot crops exactly match final board pixels

49 / 49

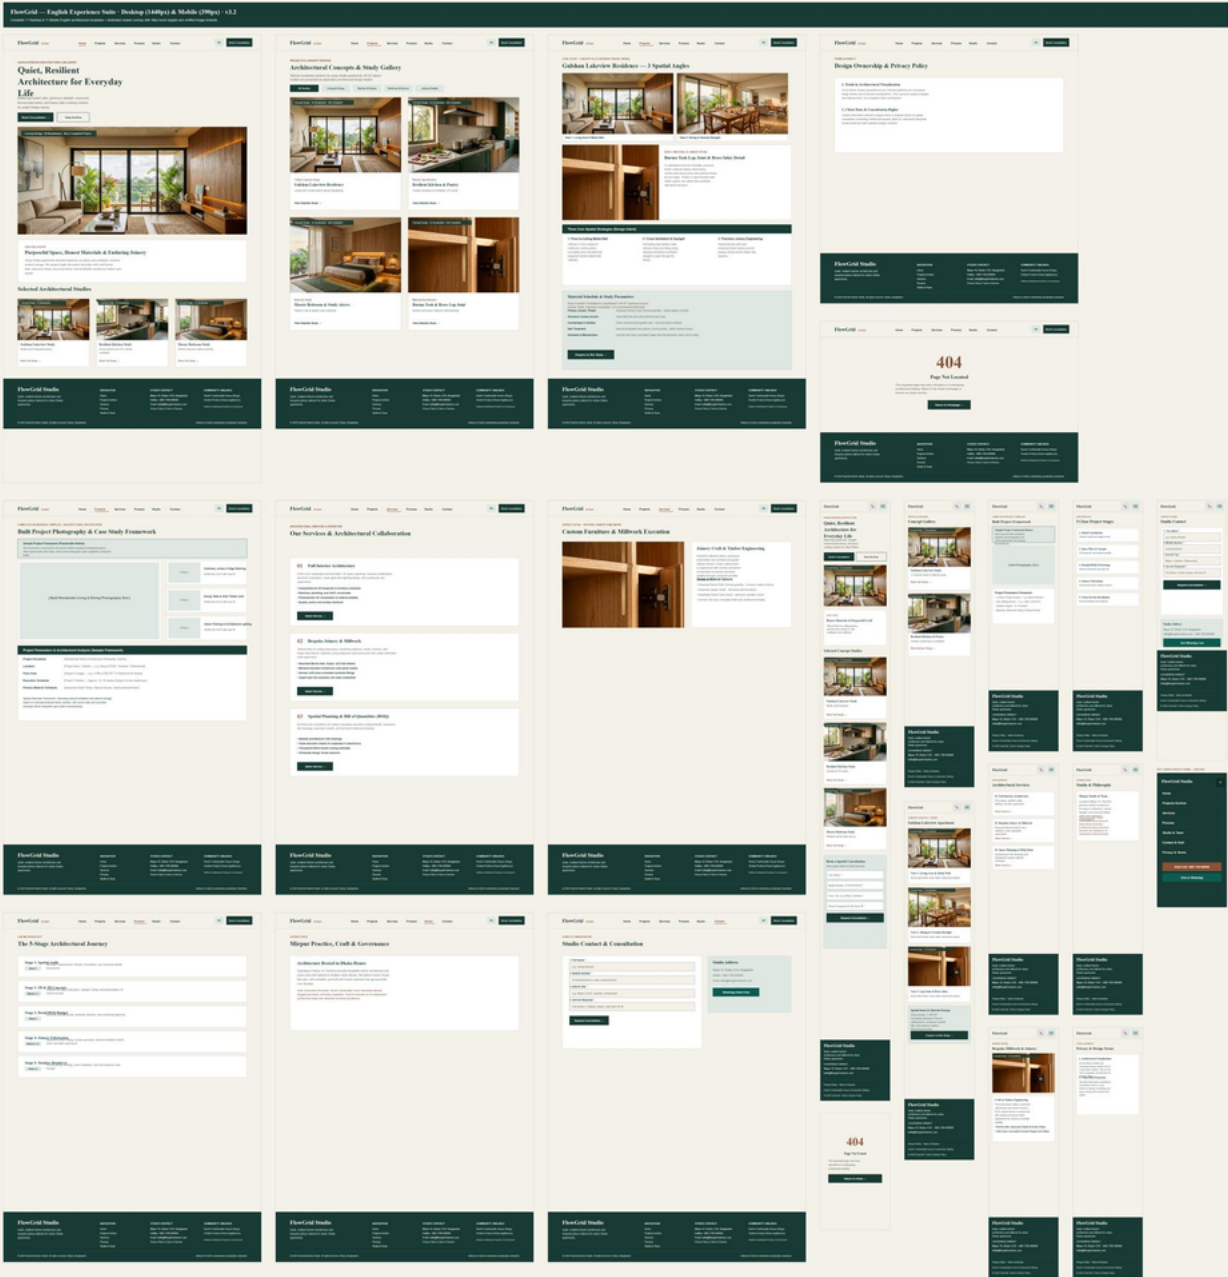

Embedded image occurrences match supplied JPEGs

Also corrected: owned-factory copy, missing anchors, “Not sure yet,” optional notes, draft storage, the original alphabetic phone bug and reduced-motion CSS.

NATIVE FIGMA COMPLETION REMAINS UNVERIFIED

Static SVG layouts do not prove native Auto Layout, component instances, variables or connected Figma reactions.

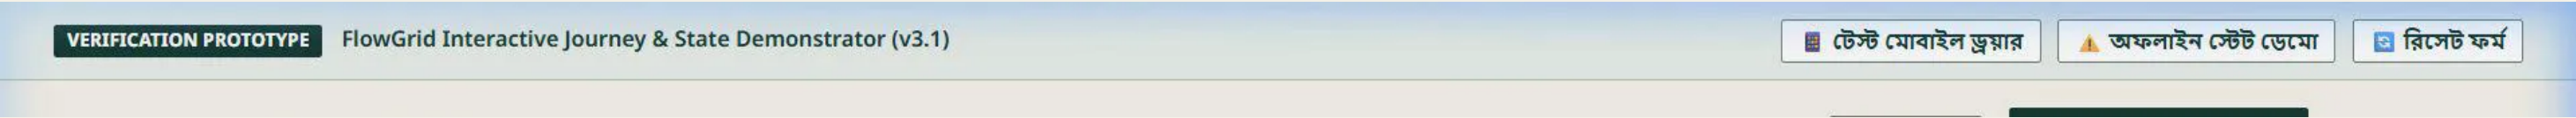

CURRENT ENGLISH BOARD / SUPPLIED PNG

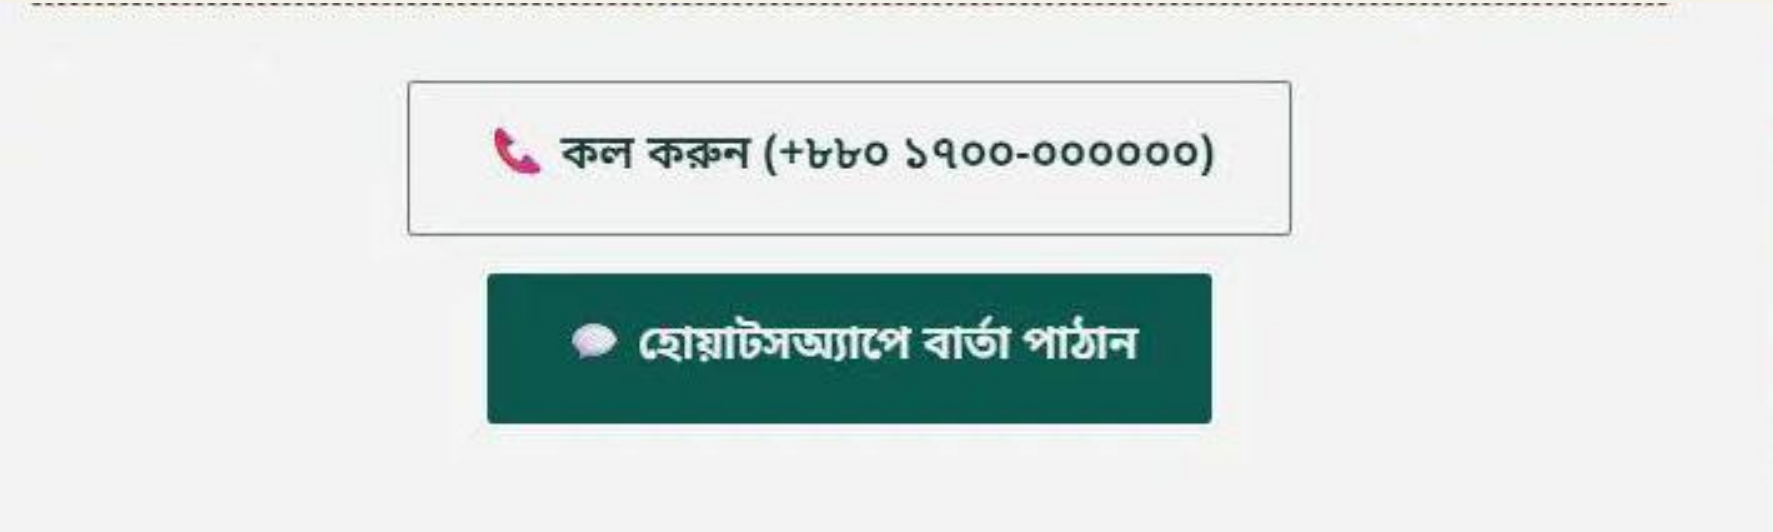

The recording is playable — but shows v3.1

212 frames · 1920 × 924 px · 3,807,960 bytes · 21.2 seconds. File validity does not prove version relevance.

FRAME 0: THE RECORDED VERSION IS VISIBLE

RECORDED RECEIPT: CALL AND WHATSAPP ACTIONS

PACKAGED v3.2 HTML

Receipt action IDs:

btnDone

btnNewEnquiry

Labels: Done / New enquiry.

The old contact actions are absent.

WHAT THIS PROVES

An earlier prototype had visible form, error, receipt, concept-tab and drawer interactions.

It does not verify the current focus handling, phone validation, notes, persistence or language changes.

The recording is desktop-sized; opening its drawer does not demonstrate mobile reflow.

Required: record the exact final HTML after the remaining corrections, and verify the saved recording plays.

Correct screenshot, still clipped in the PDF

The source crop now contains the complete form. Slide 7 displays only its upper section.

- Submit button

Fit the full form within the slide or give it a dedicated panel.
Keep partial previews clearly labelled as previews.

NEXT ACCEPTANCE STEP

Prove the native Figma checkpoint, then reconcile the current prototype, recording, PDF and report. Retain the export work that now passes.
